### **DETAILED ACTION**

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

1

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding to claim 1, claim recites a Bragg grating having a filter response the grating coupled to the light source and stabilized so that the filter response is over a range overlapping at least part of the optical spectrum of the source. Claim fails to provide the limit of a range overlapping which render the claim confusing, vague and indefinite.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/084,788

Art Unit: 2828

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koch et al (5,299,212) in view of Mizrahi (5,673,129).

With respect to claims 1-10, Koch et al discloses a wavelength stabilized optical fiber communication system comprising multi-segment DBR laser (10) emits radiation (11), a pump source (12), splitters (13, 18), the optical fiber (20), a Bragg grating (21), detectors (1, 19, 22), the feedback circuit includes (23, 24, 26), the control unit (26), sensor (27) and the thermoelectric cooler means (17), note col. 3 line 51 to col. 5 line 31, see fig. 3. However Koch et al do not discloses the optical taps. Whereas Mizrahi discloses the optical taps comprises fiber coupler, fiber grating and directional tap, note col. 2 line 29 to col. 10 line 20, see figs. 2a-5. For the advantageous of wavelength stabilized semiconductor laser, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Koch with the optical taps as taught or suggested by Mizrahi.

#### **Citation Of The Pertinent References**

4. The prior art made of record and not relied upon us considered pertinent to applicant's disclose.

The patent to Nasu et al (US patent 6,282,340) discloses light wavelength tuning device and light source optical demultiplexer and wavelength division multiplexed optical communication system using the tuning device.

The patent to Mizrahi et al (US patent 5,875273) discloses laser wavelength control under direct modulation.

The patent to Rakuljic et al (US patent 5,691,989) discloses wavelength stabilized laser source using feedback from volume holograms.

### **Communication Information**

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan M Nguyen whose telephone number is (703) 306-0247. The examiner can normally be reached on 8am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 306-5511 for regular communications and (703) 306-5511 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-3329.
